PDF Rendering

Powered by PDF.js

Cambuz uses Mozilla PDF.js, a battle-tested PDF rendering engine. It supports complex layouts, embedded fonts, vector graphics, and Unicode text including Indian languages.

Cambuz PDF Reader

Read. Search. Print. Done.

Clean and Modular

The application separates rendering, text extraction, and printing into independent modules. This makes it easier to maintain, test, and extend with future features.

Lightweight by Design

Cambuz is designed to be fast and responsive. It loads quickly, renders pages efficiently, and uses minimal system resources compared to larger PDF suites.

Future Phases

What Comes Next

Phase 2 adds search, thumbnails, and bookmarks. Phase 3 adds printing. Phase 4 adds basic PDF utilities. Each phase builds on the previous one while keeping the application lightweight.
